### Project outline

*Every year the Federal President of Germany launches a competition to promote the political, historical and cultural awareness of young people. This year, the competition focuses on developing adolescents' sensitivity towards and understanding of other cultures. Student groups (3 people) who would like to participate in the competition have to plan a journey for their whole class to a city in a different country. The winners of the competition will be invited to go on the trip as planned together with their class without having to pay for it. The winning team will be chosen through the voting of all participants and a jury.*

#### Expected content of the trip:

You have to create an exciting and varied schedule for the journey **including accommodation and transport**. Since the focus of the competition lies on culture your schedule has to include different experiences enabling your fellow students to really immerse in the culture of the country you are travelling to. This is why your trip has to involve all the following aspects:

- ...an educational experience (e.g. a university, a museum, a display of art, an important historical site),
- ...a sports event OR a musical performance,
- ...a traditional culinary setting,
- ...a festivity typically celebrated in that particular country. You should find opportunities for the group
  - to get a good idea of the history of the festival,
  - to find out how it is generally celebrated today,
  - to attend a particular event or attraction for tourists.

To also train economic skills there is a budget of €400 per student (only for the activities mentioned before). This means the activities mustn't cost more than that.

### **Additional requirements:**

1. Your task is to create a schedule from Wednesday morning to Monday evening. Consider the pieces of information that are given in the description above.
2. Research the city you were given to find out how you could best arrange a trip for the group that includes all the activities you are required to incorporate. For the planning stage you will get a workbook to guide you through the process of creating the trip.
3. Also think about how you get to places within the city and find an **appropriate** accommodation. Research these issues online and put them down in your notebook.
4. Don't forget to calculate how much the whole trip (including transport within the city, entrance fees ...) will cost (per person). Budgeting is an important skill.
5. You have two weeks to plan the trip. On presentation day every team will present their schedule. The presentation should attract people's attention and make them interested in **your** city. This means you produce an interactive map which includes appealing pictures and relevant information. Also, you have to talk to the audience in a convincing and lively manner.

For these next two weeks you need a **doctor's certificate for every English lesson** that you cannot be in school.

**Note:** The map presentations have to be finalized one day before the presentation. After that they cannot be changed. You must include an **audio** of every student presenting their part. The audio can be recorded directly within the virtual map. The audio files are **only** used in case you are sick on presentation day so that your partners are still able to present a well-rounded trip. It will not be accessible for anyone else. Every student should speak for about **five minutes**.

6. After all the presentations are completed, the whole group will vote for the trip that they liked most and met most of the criteria.

These are the criteria for the evaluation of your performance

<b>Performance during preparation phase</b>	<b>Content</b>	<b>Presentation</b>	<b>Language</b>
<b>40 %</b>	<b>60%</b>		
Continuous and productive completion of tasks in collaboration with the other team members as outlined in the project workbook	Visual presentation and oral presentation in accordance with the description above	Free speech, eye contact, interaction with instructors and fellow apprentices, competence in dealing with presentation technology	Grammar (tenses, syntax, word order, ...), fluency, pronunciation, vocabulary
